

JAWAD AL MARHOON

Technology Executive | Solution & Enterprise Architect | Program Delivery | PMP® | TOGAF®

Saudi Arabia • +966-50-386-8474 • jawad.a.almarhoon@gmail.com • [LinkedIn](#) • [Website](#)

PROFESSIONAL SUMMARY

Senior technology leader with 10+ years of progressive experience spanning solution architecture, enterprise program delivery, infrastructure, DevOps, and engineering management across banking and logistics in Saudi Arabia. PMP® and TOGAF® certified, with a track record of translating business strategy into scalable technology solutions owing delivery from architecture blueprints and HLD/LLD documentation through to production. Proven ability to build high-performing engineering organizations, govern multi-vendor programs, and drive measurable outcomes across cost, quality, and time-to-market. Currently Acting CTO; long-term trajectory toward CTO/CIO leadership.

TECHNICAL PROFICIENCIES

Cloud Platforms	Oracle Cloud Infrastructure (OCI), Microsoft Azure, Google Cloud Platform, DigitalOcean
DevOps & CI/CD	Jenkins, GitLab, ArgoCD, Nexus, GitHub Actions, GitOps, Kubernetes, OpenShift, Docker
Architecture	Solution Architecture, Enterprise Architecture (TOGAF ADM), HLD/LLD, API Design, C4 Modelling
Languages	Java, Python, C#, SQL, JavaScript, VB
Backend & APIs	Spring Boot (RESTful), .NET/MVC, Entity Framework
Frontend & Mobile	Angular, React, Flutter, Xamarin (iOS & Android), HTML, CSS
Databases	Oracle DB, SQL Server, MySQL, PostgreSQL, MongoDB
Security	IAM, WAF, Site-to-Site VPN, Disaster Recovery, Network Segmentation
Delivery & Governance	PMP, Scrum/SAFe, Waterfall, RAID Management, Jira, Confluence, MS Project, SAP

AREAS OF EXPERTISE

Program & Delivery Management

PMP®-certified with a record of governing complex, multi-vendor programs end-to-end — RAID management, budget oversight, C-level reporting, and post-go-live stabilization across banking and logistics.

Solution & Enterprise Architecture

TOGAF®-certified; designs end-to-end solutions producing HLD, LLD, and integration specifications. Experienced in cloud-native, hybrid, and on-prem architecture patterns across regulated industries.

Cloud Infrastructure & Security

Owns cloud environments on OCI, Azure, and GCP — covering network topology, IAM, WAF, disaster recovery, and S2S VPN integration with governmental and partner systems.

Engineering Leadership & Team Building

Recruits, scales, and mentors engineering organizations of 12+; establishes onboarding frameworks, OKR cycles, code quality standards, and engineering culture from the ground up.

DevOps & Continuous Delivery

Builds CI/CD pipelines automating 90%+ of deployments; implements GitOps and monitoring tooling to reduce release cycles by 60% and cut incident detection time by 45%.

Stakeholder & Governance

Manages C-level, regulatory, and governmental stakeholders; chairs steering committees, defines architectural standards, and maintains governance frameworks across business units.

EDUCATION

MSc — High Performance & Cloud Computing

King Fahd University of Petroleum & Minerals (KFUPM), Dhahran

2025

BSc — Software Engineering

King Fahd University of Petroleum & Minerals (KFUPM), Dhahran

2017

PROFESSIONAL EXPERIENCE

Technical Lead — Acting CTO | CAMION • Al-Khobar, Saudi Arabia | Oct 2024 – Present

Transportation, Logistics, Supply Chain & Storage

- Developed a 2-year technology roadmap — covering cloud migration, security posture, and system integration across all business domains — ratified by the executive committee and serving as the governing reference for all technology investment decisions.
- Owned end-to-end program delivery across 3 external vendors and 2 cloud partners, managing a total program budget of 8M SAR; maintained a live RAID log, weekly C-level status reporting, and 100% milestone adherence across the first two quarters.
- Authored the cloud architecture blueprint for OCI — defining network topology, subnet segmentation, IAM, WAF, and disaster recovery strategy with defined RTO/RPO targets — achieving 99.9% uptime within 3 months of go-live.
- Assembled and scaled a technical team of 12 across development, support, and production; established role frameworks, structured onboarding, and quarterly OKR cycles — achieving 100% retention in the first year and reducing ramp-up time by 30%.
- Led integration with 5+ governmental and third-party services via Site-to-Site VPN and REST API gateways, producing HLD and integration specifications adopted as the architectural standard for all future partner onboarding.
- Reduced infrastructure costs by 25% through OCI resource optimization, reserved instance planning, and FinOps governance introduced at program inception.
- Enforced security and delivery governance standards aligned with Saudi regulatory requirements, closing 80% of compliance gaps within the first quarter.

Digital Transformation Lead | BSF (Banque Saudi Fransi) • Riyadh, Saudi Arabia | Aug 2022 – Aug 2024

Banking & Financial Services — Regulated Environment

- Spearheaded the Omnichannel Banking Program — the bank's largest digital initiative with a 100M SAR program budget — producing the end-to-end solution architecture (HLD, LLD, and integration specifications across 6 internal systems and 3 third-party APIs) and coordinating 4 Agile squads across mobile, web, and branch channels; reduced customer service response time by 40% and improved CSAT scores by 35%.
- Governed program delivery across an 18-month timeline: maintained a RAID log, escalated and resolved 12 critical risks with zero program-level delays, and delivered weekly executive reporting to the CTO and business sponsors.
- Contributed to digital architecture governance, defining architectural standards and principles — covering API design, cloud patterns, and integration protocols — adopted across 3 business units.
- Implemented CI/CD pipelines (Jenkins, GitLab, ArgoCD, Nexus) that automated 90% of deployments and cut release cycles by 60%, enabling daily production releases with zero-downtime rollouts.
- Managed hybrid OCI and on-premises infrastructure supporting 500K+ monthly active users at <0.1% error rate; conducted quarterly capacity reviews ensuring 3x traffic headroom.
- Improved Agile squad velocity from 65% to 90% over 6 months through structured Scrum ceremonies, sprint retrospectives, and team health metrics across 4 squads.
- Deployed security tooling, backup automation, and monitoring dashboards; reduced MTTD by 45% and ensured continuous compliance with SAMA digital banking regulations.

Digital Channels Development Lead | BSF (Banque Saudi Fransi) • Riyadh, Saudi Arabia | Dec 2020 – Jul 2022

Banking & Financial Services

- Led Waterfall delivery of 3 major channel initiatives — public website revamp, intranet migration, and email marketing platform — all on schedule and within budget, with full sign-off from business and compliance stakeholders.
- Resolved 20+ critical vulnerabilities in FransiPlus and FransiMobile (Spring Boot, Angular), reducing the security attack surface by 70% and meeting SAMA regulatory audit requirements.
- Enhanced the Jana loyalty program by integrating 4 new partner rewards and redesigning the redemption UX, increasing active customer enrolments quarter-on-quarter.
- launched an email marketing campaign reaching 200K+ customers, driving a 15% uplift in digital channel engagement.
- Governed digital content across 3 CMS-managed properties, maintaining 100% compliance with brand standards and SAMA digital guidelines.

Senior Software Engineer | Tech Mahindra • Al-Khobar, Saudi Arabia | Aug 2020 – Dec 2020

Global Software Solutions — Client: Saudi Aramco

- Built an SAP-integrated desktop application (C#, .NET/WPF) for Saudi Aramco, integrating plant material waste reporting directly with SAP — eliminated 95% of manual data entry errors and saved 10+ hours of weekly processing time.
- Developed a Spring Boot Java cloud monitoring solution for real-time printer fleet management, reducing unplanned downtime by 25%.

Full Stack Software Developer | Reservoir Technologies • Dammam, Saudi Arabia | May 2017 – Jul 2020

Quality Consulting — Petroleum & Natural Gas

- Sole architect and developer for a bespoke enterprise system (C#, Spring Boot RESTful API, SQL Server, MVC) for a major petroleum client — acted as both technical lead and delivery manager across 5 major releases over 3 years.
- Optimized database architecture and query performance, cutting average report generation time from 45 seconds to under 8 seconds (82% improvement) with zero additional infrastructure spending.
- Designed and launched the company's Angular-powered website, establishing its first digital presence and generating 3 new inbound client leads within 6 months.
- Reduced support tickets by 30% through iterative UX improvement cycles, applying user testing feedback directly into each release across 4 application modules.

Full Stack Software Developer | Themar AlMarifah • Qatif, Saudi Arabia | Sep 2016 – Feb 2017

Hardware & Software Solutions

K2 Developer — Internship | Zamil Industrial Investment • Dammam, Saudi Arabia | Jul 2016 – Aug 2016

Engineering & Construction

KEY PROGRAMS & ACHIEVEMENTS

Omnichannel Banking Program — BSF

40% faster customer response **35%** CSAT improvement **18 months** on-time delivery **100M SAR** program budget

CI/CD & DevOps Transformation — BSF

90% deployments automated **60%** release cycle reduction **45%** faster incident detection

SAP Integration — Saudi Aramco — Tech Mahindra

95% data entry errors eliminated **10+ hrs.** weekly time saved

Cloud Program — CAMION — Acting CTO

99.9% uptime in 3 months **25%** infra cost reduction **8M SAR** program budget governed

Technology Roadmap — CAMION

2-year roadmap, exec-ratified **5+** gov. integrations delivered **80%** compliance gap reduction

Petroleum Enterprise System — Reservoir Technologies

82% faster report generation **30%** support ticket reduction **5 releases** sole architect & PM

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Project Management Professional (PMP) • TOGAF® Enterprise Architecture Practitioner • Google Cloud Professional Cloud Architect
- Certified Scrum Master (CSM) • Oracle Cloud Infrastructure Certified Architect Associate • DevOps Fundamentals

Professional Development: Malware Development & Analysis • Ethical Hacking • GE Innovation Centre Hackathon Trainer
